

HICSS-39 Semantic Web Service Tutorial

Hands-On Session Software Preparation

1. Unzip/copy HICSS directory to a convenient location
2. Ensure you have a valid installation of Java (JRE or JDK of 1.5.x with JAVA_HOME set in the environment and %JAVA_HOME%\bin included in PATH; if not 1.5.0_05 is provided in the 'ExternalTools' folder and should be installed and these environment variables set)
3. Ensure you have a valid installation of Apache Ant (1.6.5 has been tested and is provided in 'ExternalTools', again its 'bin' folder must be in the PATH variable)
4. Copy the code folder from 'IRS-III\Lisp' to 'c:\users\jbd2' (i.e. forming 'c:\users\jbd2\code' etc.)
5. Launch all tools by executing 'tutorial.bat', when the IRS Visualiser is shown, navigate to IRS Browser, accept the default server settings (localhost:3000), and log-in as wsmo:wsmo. Finally, navigate to the Web Services Modelling Toolkit (WSMT)
